

Waterslide Options:

fiberglass flume and tube type slides

Fiberglass flume slides come in two sizes: 4 ft high, 10 ft long and 6 ft high, 16 ft long. They are also available in sections for longer slides or as enclosed tube slides. RicoRock castings are backfilled with concrete (above) or welded to a steel frame (left).

Our new RicoRock slide kit is a freestanding structure that installs in one day. Custom projects require special rock skills.
